Re: proposed Vaccine passports in Montgomery County

As has come to light over the past month, the COVID-19 Vaccine offers a limited time of protection and is more like the flu shot than an actual vaccine. Fully vaccinated and bolstered citizens are walking around spreading COVID while under the impression that they're immune. A vaccine passport does nothing to protect anyone but does in fact stealthily spread the virus while everyone is under the impression they're safe.

Meanwhile, conveniently the unvaccinated are blamed. A vaccinated person whose vaccine coverage has expired is therefore also unvaccinated. Where do you draw the line on how many shots a person needs? And how about a passport for a person who's had and recovered from COVID? Or a passport for the person who lives a clean life, free of drugs and junk food, determined to maintain a healthy immune system? I'd like one of those. Because no matter how much you push these vaccines, an immune system is actually necessary to fight disease. And conveniently, we're all born with an immune system. A vaccine is not a platter full of antibodies, handed to you like a gift with purchase. When did it become a crime to be healthy, to choose clean living and say no to drugs and other toxins. These vaccines have been pushed out in record time and the public are the test subjects. There are serious side effects associated with the vaccines and I have no intention of playing Russian roulette with my life or the lives of my children. And I don't need you punishing me and my family for that decision by taking away our right to go out for dinner, go the theater or to gym.

If the vaccine can't stop the spread and can't prevent the taker of the vaccine from getting COVID, then the only purpose is to lessen the severity of the disease for that person. Why do you care whether or not I take the vaccine if the only one it's affecting is me? We are all grownups here, taxpayers and contributing members of this community. Stop your massive overreach and instead focus on making the county a prosperous place for EVERYONE.
